## Performance

### Metrics

▲ First Contentful Paint	4.3 s	▲ First Meaningful Paint	4.3 s
Speed Index	4.3 s	First CPU Idle	4.3 s
Time to Interactive	4.6 s	Max Potential First Input Delay	130 ms

View Trace

Values are estimated and may vary. The performance score is based only on these metrics.

**Opportunities** — These suggestions can help your page load faster. They don't directly affect the Performance score.

Opportunity	Estimated Savings
▲ Eliminate render-blocking resources	1.54 s
▲ Remove unused CSS	1.2 s

**Diagnostics** — More information about the performance of your application. These numbers don't directly affect the Performance score.

▲ Ensure text remains visible during webfont load	▼
▲ Serve static assets with an efficient cache policy — 7 resources found	▼
Avoid chaining critical requests — 12 chains found	▼
Keep request counts low and transfer sizes small — 13 requests • 487 KB	▼

Passed audits (18)

## Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

**Contrast** — These are opportunities to improve the legibility of your content.

▲ Background and foreground colors do not have a sufficient contrast ratio.

**Names and labels** — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲ Form elements do not have associated labels

**Additional items to manually check (11)** — These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

**Passed audits (20)**

**Not applicable (13)**

## Best Practices

▲ Does not use HTTP/2 for all of its resources — 8 requests not served via HTTP/2

▲ Does not use passive listeners to improve scrolling performance

▲ Includes front-end JavaScript libraries with known security vulnerabilities — 1 vulnerability detected

**Passed audits (12)**

## SEO

These checks ensure that your page is optimized for search engine results ranking. There are additional factors Lighthouse does not check that may affect your search ranking. [Learn more](#).

▲ Document does not have a meta description

**Additional items to manually check (1)** — Run these additional validators on your site to check additional SEO best practices.

**Passed audits (9)**

**Not applicable (3)**

## Progressive Web App

These checks validate the aspects of a Progressive Web App. [Learn more.](#)

### Fast and reliable

Page load is fast enough on mobile networks

▲ Current page does not respond with a 200 when offline

▲ start\_url does not respond with a 200 when offline **No usable web app manifest found on page.**

### Installable

Uses HTTPS

▲ Does not register a service worker that controls page and start\_url

▲ Web app manifest does not meet the installability requirements **Failures: No manifest was fetched.**

### PWA Optimized

▲ Does not redirect HTTP traffic to HTTPS

▲ Is not configured for a custom splash screen **Failures: No manifest was fetched.**

▲ Does not set a theme color for the address bar.  
**Failures: No manifest was fetched, No `**

Content is sized correctly for the viewport

Has a `<meta name="viewport">` tag with width or initial-scale

Contains some content when JavaScript is not available

▲ Does not provide a valid apple-touch-icon

**Additional items to manually check (3)** — These checks are required by the baseline [PWA Checklist](#) but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
